

PRACTICE PROBLEMS AND LAB TIME

An aerial photograph of a residential neighborhood that has been completely inundated with floodwater. The water is a murky, brownish-grey color, covering the streets, lawns, and yards of numerous houses. The houses have various roof colors, including grey, brown, and red. Many trees are still standing in the water, their green foliage contrasting with the brown water. The flooding appears to be quite deep, reaching up to the second stories of some houses in places. The overall scene depicts a significant natural disaster impact on a community.
