

PRACTICE PROBLEMS AND LAB TIME

An aerial photograph of a residential neighborhood that has been completely inundated with floodwater. The water is a murky, brownish-grey color, covering the streets, lawns, and yards. Numerous houses with various roof colors (brown, grey, red) are visible, some with water reaching up to their windows. Large green trees are scattered throughout the area, some with water reaching their lower branches. In the background, a river or larger body of water is visible, with a green embankment and some trees. The overall scene depicts a severe flooding event.
