

PRACTICE PROBLEMS AND LAB TIME

An aerial photograph of a residential neighborhood that has been completely inundated with floodwater. The water is a murky, brownish-grey color, covering the streets, lawns, and yards. Numerous houses with various roof colors (brown, grey, red) are visible, some with water reaching up to their windows. Trees are scattered throughout the area, some with their lower branches submerged. A few cars are partially visible in the water. In the background, a green golf course is visible, and a river or canal winds through the upper right portion of the image.
