

PRACTICE PROBLEMS AND LAB TIME

An aerial photograph of a residential neighborhood that has been severely flooded. The water is murky and covers almost all the ground, including streets, lawns, and yards. Only the roofs of houses and some trees are visible above the water level. The houses are mostly single-story with various roof colors like brown, grey, and red. The trees are green and scattered throughout the neighborhood. In the background, a river or larger body of water is visible, and a road with some vehicles can be seen on the right side.
